The Right Stuff for Landholders

Echo—the best warranty in the business

Echo has been making high quality outdoor power equipment for nearly 50 years. For many years Echo products have come with the best domestic warranty available—5 years. What you may not know is that Echo products also have a full 2 years warranty for commercial users.

With many organisations' having a two year equipment replacement cycle, by using Echo products it is possible to run power equipment in a commercial environment that is always covered by a warranty.

Echo—Japanese quality backed by the confidence of the best warranty in the business.

Save Time with Ariens/Gravely Zero Turn Ride-ons

At The Right Stuff we are agents for Ariens and Gravely, the pioneers of zero-turn mowers. You can cut your mowing time in half using a zero turn mower instead of a traditional lawn tractor, due to:

- The maneuverability of zero turn mowers allows you to mow around trees, flower beds and other obstacles more easily than with a steering wheel vehicle such as a lawn tractor.
 - Zero turn mowers are designed to cut grass nearly twice as fast as traditional lawn tractors so your straight line mowing speed is improved. A typical lawn tractor cuts at a speed of 5-8kph while an Ariens or Gravely zero turn mower cuts at a speed of 8-13kph.
 - When you get to the end of the area to be mowed and have to turn around and come back, you literally can spin 180 degrees and come straight back without having to back up and cut the strips of grass you would miss when making the turn with a lawn tractor.
 - With an unobstructed view of the cutting deck, zero turn mowers make it easy to cut very close to the edge – you can nearly eliminate the need to trim hard-to-reach areas with a push mower or trimmer after you've finished mowing.
- The operator sits lower on an Ariens/Gravely zero-turn, increasing stability and comfort. This is not true of all brands of zero-turn mower.

<p>Special points of interest:</p> <ul style="list-style-type: none"> • Echo's 2 year <u>commercial</u> warranty • How Ariens and Gravely zero-turn ride-ons save you time and money • Outsource the care, repair, and maintenance of your irrigation systems • Bargain wire and valve locator 	<h3>Echo Top Handle Lopping Chainsaws</h3> <p>The Echo CS260TES and CS350TES are the industry leaders in top handle chainsaws. At 2.9kg and 3.5kg respectively these saws are comfortable to use with one hand and the top handle configuration gives a compact format that is easy to use in tight locations.</p> <p>The CS260TES comes with a 26.9cc motor and a 10" bar, while the CS350TES has a 35.8cc motor and 14"bar. Both are equipped with a standard lanyard attachment point.</p> <p>The CS350TES is currently available for the same price as the CS260TES, and both come with a free Echo bonus pack consisting of a fuel can, Echo Powerblend 2 stroke oil, Echo bar & chain oil, ear muffs, safety glasses, and an Echo cap.</p>

Irrigation Repair and Maintenance Services

The business that became The Right Stuff for Landholders began life as irrigation specialists - Freshwater Irrigation. Today irrigation design, supply, installation, and repairs and maintenance remain a major part of our business.

Care and maintenance of irrigation systems requires a planned schedule to set seasonal options in controllers, and to periodically test run the system and fix any problems identified. In addition parts of the system can be broken or fail requiring emergency attention. Where pumps are used regular inspection is essential to minimize the chance of expensive damage.

The Right Stuff can provide these services as part of an ongoing support and maintenance service. Costs vary, depending on the size, type, and location - an initial inspection is required to give a quote.

Call us for more information.

SPECIAL—Commercial wire & valve locator

We have an Armada PRO700 wire and valve locator in stock, the same model as we use. Normally these sell for \$2,175 (inc. GST), we are offering this one for \$1,600.

Call or drop in for further information.

Echo Engine Drill

The Echo EDR2400 engine drill is ideal for fencing contractors and anyone working away from mains power who need a cordless drill with serious grunt.

With a 23.6cc engine and forward/reverse capability the EDR2400 can be used to drill, dig post holes, even to stir paint!

CAMLOCK fittings

We are now stocking a range of polyprop CAMLOCK fittings in 1", 1.5", 2", and 3" sizes. You'll find that our pricing on these fittings is competitive.

We also have a few 1.25" CAMLOCKS, but have found these are not often used and seem to come in a variety of incompatible versions of 1.25"! If you need 1.25" fittings please bring in a sample to be sure that we supply the right parts.

If you require particular CAMLOCK fittings that we do not stock, they can usually be here within two days. Call us with your requirements.

Big ones, small ones,...
